Nylon has been recognized as a rugged engineering plastic since its development in the 1930s. Aimed as a substitute for metal, nylon's light weight and corrosion and abrasion resistance have made it an attractive choice. Nylon can withstand repeated flexing over time without fatigue or fracture and is well suited for retractable coils. NYLOTUBE® also offers high impact resistance, even at subfreezing temperatures. NewAge® Industries stocks NYLOTUBE in nylon-12 formulation.

Polyethylene has long been recognized as exhibiting a high degree of inertness and is desirable for food and beverage, laboratory, and chemical processing applications where leaching or permeability present risks. ZELITE™, NewAge's brand of polyethylene tubing, is offered in a linear low density formulation for repeated flexing and improved stress crack resistance (over low density material). ZELITE is a standard in the food and beverage processing and pneumatic industries. Its semi-rigid nature allows it to be used with push-to-connect fittings. Polyethylene-lined EVA tubing is a co-extruded product. It is typically applied where different performance requirements for the inside and the outside of the tube are needed (cleanliness inside, flexibility outside).

Polypropylene is the lightest of all thermoplastics available today. It offers excellent dimensional stability and electrical properties, good surface hardness and chemical resistance, and easy coloration. PROLITE® is NewAge's brand of polypropylene tubing.

In many areas where fluoropolymer tubing is typically used, polypropylene can be employed as a relatively low-cost alternative. The high-crystalline composition also makes it good for use in structural systems. Polypropylene is weldable and, when welded, can be used in non-fluid transfer applications.

### Applications

- Appliances
- Automotive Fluids
- Chemical Transfer
- Compressed Air
- Computer Equipment
- Conduit
- Dispensing Equipment
- Electronic Equipment
- Environmental Monitoring
- Fluid Feeds
- Food & Beverage
- Grease Lines
- Hospital & Laboratory Uses
- Housewares
- Instrumentation
- Manufacturing Equipment
- Paint Supply
- Personal Care Products
- Pharmaceutical Processing
- Pneumatic Controls
- Pool & Spa Supply Lines
- Potable Water Systems
- Refrigeration & Cooling Systems
- Semiconductor Manufacturing
- Spacers
- Well Pumps
- Wire Jacketing
- More

**Nylon-12 Tubing**

- Very low moisture absorption: 1.4% maximum (at 73°F)
- Will not become brittle or swell because of water
- Excellent resistance to flexural fatigue, tube vibration, and movement
- Lightweight with excellent bend radii and pressure ratings
- Resists crushing, abrasion, and cracking
- Heat and light stabilized
- Free of BPA, conflict minerals, phthalates and latex
- REACH and RoHS compliant
- Available in semi-rigid or flexible grade, inch and millimeter sizes, and in colors

**Notes**

NYLOTUBE is resistant to most solvents, alkalies, oils, greases, petroleum products, fungi, and molds. It has generally good resistance to dilute mineral and organic acids, but in cases where NYLOTUBE is being used in critical applications or aggressive environments, in-plant tests are always recommended.

NYLOTUBE is manufactured from heat- and light-stabilized materials. Nylon brittleness is usually caused by cycles of water absorption and depletion. NYLOTUBE is not dependent on moisture for flexibility, so life expectancy is increased and the risk of brittleness greatly reduced.

Contact us for information on nylon-11 tubing and custom coiled nylon.

**Recommended Fittings**

- Newloc® Acetal push-to-connect fittings
- Newloc® Brass push-to-connect fittings

add length suffix to part number when ordering. Example: 250 ft. of .190” I.D. x 1/4” O.D., natural color tubing is number 233 2470-250.

BOLD indicates the critical dimension for fittings application.
**Zelite**™

**Linear Low Density Polyethylene Tubing**

- Made from non-toxic ingredients conforming to FDA standards
- Does not impart a taste or odor to critical streams
- Flexible, lightweight, durable
- Translucent natural or opaque colors
- Made from 100% virgin grade raw materials
- Good dielectric properties
- Offers enhanced resistance to stress cracking
- Chemically inert; forms a good barrier to gases, vapors, and moisture

**Notes**

ZELITE conforms to the applicable regulations of the FDA for use of articles intended for contact with food. The increased tensile strength of ZELITE Linear Low Density, over that of a low density polyethylene, enhances its resistance to splitting during use.

FEP-lined polyethylene, offering superior purity at a very reasonable cost, is available through minimum order. Medium-high and ultra-high density polyethylene material is available through minimum order. Call for details on these custom products.

www.newageindustries.com
Made from Class VI, FDA-sanctioned ingredients for use with food and beverage contact surfaces
- Natural translucent color for visual contact with the flow
- Remains flexible at temperatures from -29°F to 160°F
- Non-toxic; odorless, tasteless, and inert
- Remains pliable even after extended contact with alcohol
- Good weatherability properties — resists gases and moisture
- Low friction coefficient and good general chemical resistance

Notes
PE-LINED EVA (Ethylene Vinyl Acetate) tubing is designed for use where cleanliness and flexibility are required. It offers good general chemical resistance and non-toxicity. A co-extruded product, PE-LINED EVA is made of a low density polyethylene liner with an EVA outer jacket. It is manufactured in a patented process (Patent No. 4061461) to ensure the highest bond quality possible.

PE-LINED EVA tubing meets Class VI requirements and is suitable for use in poultry and meat processing. PE-LINED EVA also meets or exceeds standards in National Formulary, Vol. 14 for containers for injectables (plastics).

For working temperatures up to 180°F and greater stress resistance, ask about irradiated PE-LINED EVA tubing.

Did you know . . . ?
Our order accuracy rate is 97%. We take a number of steps to manufacture and ship your order correctly the first time.
Polypropylene homopolymer made from ingredients that meet FDA requirements for food contact surfaces

- Animal-free ingredients
- No phthalates used in the manufacture of its ingredients
- Extremely lightweight, thermoformable and weldable
- Very low moisture absorption
- Excellent chemical resistance
- Naturally translucent white in appearance
- May be used as a lower-cost alternative to fluoropolymer tubing

**Notes**

PROLITE is made from a compound that exhibits good heat aging resistance. It meets the FDA requirements for the safe use of olefin polymers used to make articles intended for food contact per FDA 21 CFR 177.1520. PROLITE is frequently used in food processing and other industries for clean applications. It is a naturally white, semi-rigid product offering limited ability to bend. Since it is weldable, PROLITE may be joined directly, although it is typically joined by means of a push-to-connect fitting such as Newloc®.

Polypropylene is the lightest of all thermoplastic materials. It offers high strength-to-weight ratio, low surface friction, and excellent resistance to corrosion.

*Did you know . . . ?*

Our rate of return due to product quality is 0.25%, less than 1/3 of the industry average.
Newloc® Acetal  Plastic Push-to-Connect Fittings
- Extremely easy to install — no tools necessary
- No flow restrictions
- Made from tough, lightweight, FDA-sanctioned materials
- Available in Fractional and Metric sizes
- Genuine John Guest brand fittings

Newloc Brass  Brass Push-to-Connect Fittings
- Made of durable brass — elbows and tees are forged
- No flow restrictions
- Much higher temperature/pressure ratings than that of plastic
- All male pipe threads come with a pre-applied fluoropolymer sealant
- Easy to disconnect and reuse

Don’t forget about Cutting Tools
- Two sizes: one for tubing up to 1-1/2” O.D. (pictured); another for sizes to 5/8” O.D.
- Both cut semi-rigid or soft tubing materials quickly and cleanly
- Lightweight, compact and durable
- Replaceable blade on larger size

99.6% Order Accuracy

We know how important order accuracy is to you. That’s why we take a number of steps to manufacture and ship your order correctly the first time. From acknowledging and confirming orders, to product quality verification, to the careful examination of custom orders, we do our best to ensure that your order ships accurately.
